- Students are faced with a HUGE list of vocabulary that is daunting and discouraging!
- Where to start?
- How to learn it all?
- How to remember and not forget?

» Work «  
Smarter  
... NOT ...  
HARDER

- They should all focus on the General Conversation Booklets at present.
- Most questions should be answered, marked and transferred onto flashcards.
- They need to be able to answer at least 10 questions on each theme.
- It is essential that they can use 3 time frames, a variety of opinions and justifications.
- For the role plays, students need to be able to ask questions.

REVISE LITTLE  
AND OFTEN.

TAKE  
BREAKS

AVOID  
DISTRACTIONS.

FOCUS ON THE TOPICS  
YOU ARE STRUGGLING WITH.

## How to work smarter

Work smarter, not harder.

- Make a weekly plan
- Turn your phone off
- Don't multitask
- Prioritize your work
- Be perfectly organized
- Measure results, not time
- Have a routine and stick to it
- Take regular breaks
- Finish what you start
- Automate as much as you can

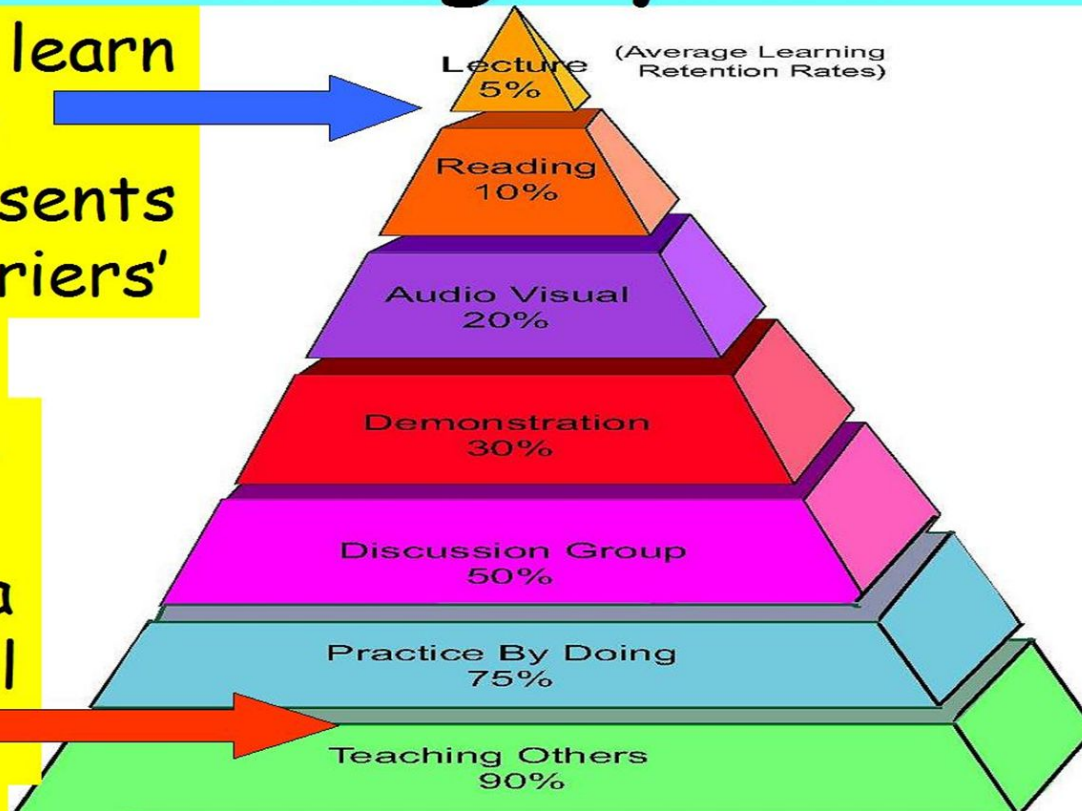

# The Learning Pyramid

Trying to learn using this often presents many 'barriers'

Effective Learning requires a great deal of this

## QUIZLET

- Research into frequently used vocabulary suggests that a small number of common words and phrases make up a significant percentage of written and spoken language.
  - In English, it is estimated that 100 words make up around half of what we read in our everyday activities and just 25 words make up a third of what we read.
  - In French, it is estimated that 600 core words make up around 90% of everyday language. Similarly, in Spanish, around 100 core words make up 50% of everyday language.
  - It is logical, therefore, to ensure that learners of French/Spanish have a secure understanding of the most common words and phrases.

- We can monitor how many words they have learnt and which section they have been working on.
- Please encourage them to learn 10 new words daily if possible on this quizlet/memrise learning new words.
- Little and often works best for language learning.

# Mind Maps

## Mind Maps

- With topics and linked vocabulary (to eat/food/ate/cake/breakfast/fork)
- Reading through these daily will build their confidence, even if it is only for 5-10 minutes
- It is also easier to remember new words if they are broken down into small manageable chunks.
- Students should aim to learn approximately 10 - 15 words daily.

## Learning to learn by Association

- Jeunesse - Eton mess (young people go to Eton)
- J'ai vu - cinema VUE where they have SEEN a funny movie (happy association)
- Oeuf - you should not eat eggs if they are OFF
- Barato/caro - Bars of chocolate are cheap but cars are expensive

## Make a story including the one French/Spanish word

- 70% of what we discuss we tend to remember
- I went to Costa plutôt qu'à Starbucks (rather than).
- We played football bien que it snowed. (although)

## The Loci Method

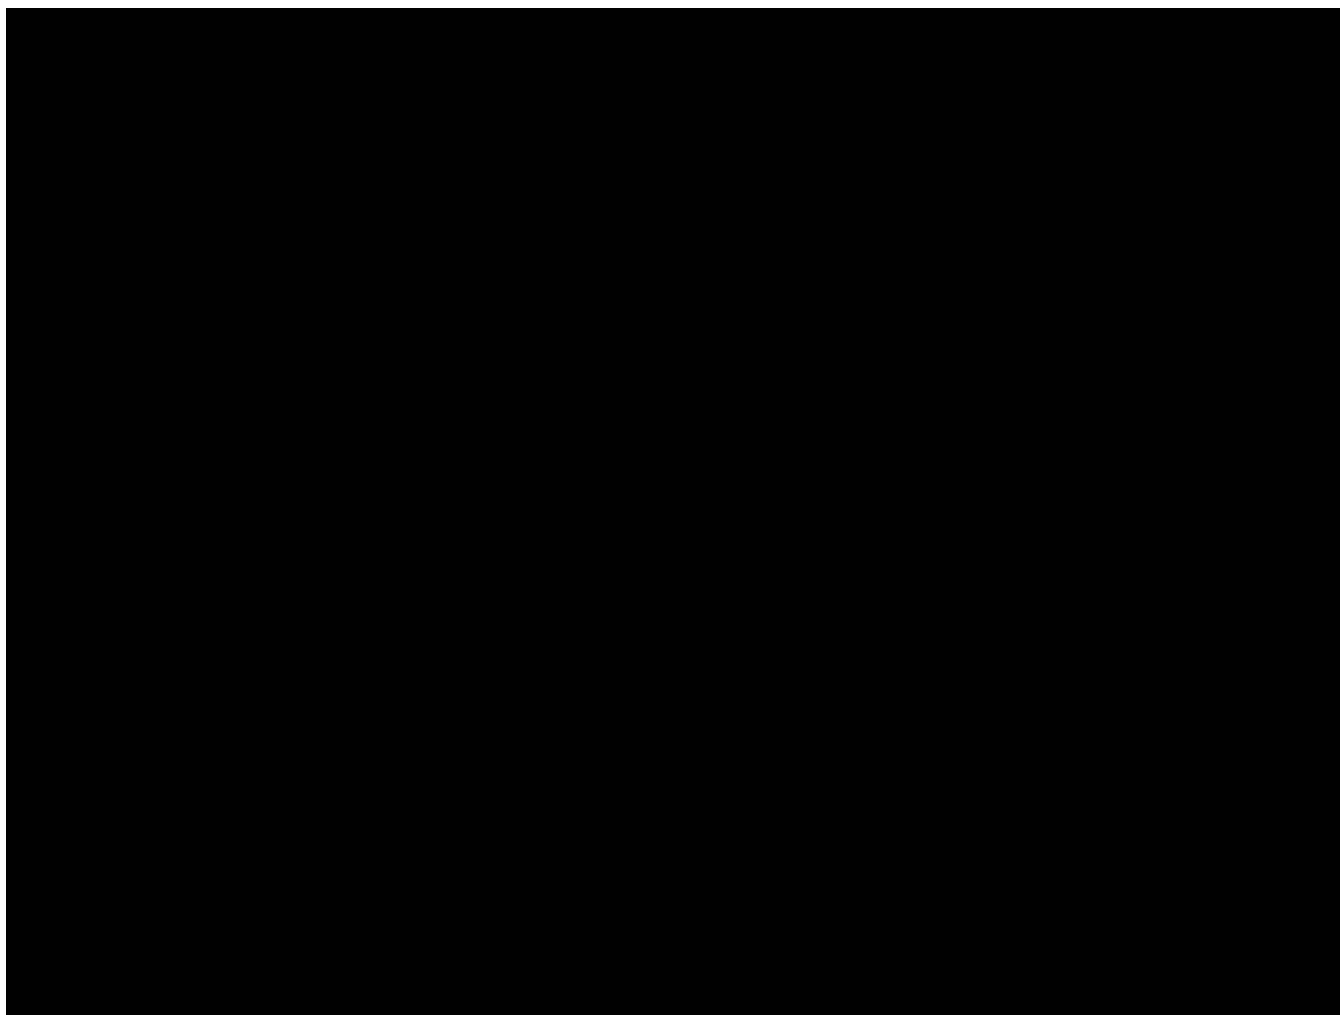

- For each topic going into a different room of the house or different corner of the room. Visualising the space as going through the list of vocab. It is easier if we associate a space with words. More memorising techniques we use, the easier it is to remember them.

1. Study with friends - pair up
2. Set goals (5 answers to learn)
3. Use post-it notes - label fridge content/cupboards (that vocabulary always comes comes up in question
4. Use the bedroom walls - colourful mind maps
5. Use as many of these different methods as possible
6. Set a challenge and then have a treat/reward
